

About the Authors

Much of **William A. Longacre's** scholarly work has been devoted to enhancing the ability to exploit ceramic variation as a means to infer aspects of prehistoric societal organization and behavior. He joined the faculty of the University of Arizona in 1964 and since 1989 has been head of the Department of Anthropology. He was director of the Archaeological Field School at Grasshopper Pueblo from 1965 until 1979. Since the mid-1970s his research has focused on ethnoarchaeology of the Kalinga. He and James Skibo have recently edited a volume on Kalinga Ethnoarchaeology, soon to be published.

James M. Skibo received his Ph.D. from the University of Arizona in 1990. His dissertation was based on data collected as part of the Kalinga Ethnoarchaeological Project. The Kalinga research is a continuation of his interest in pottery technology and function. His recent publications have explored experimentally the relationship between pottery technology and use especially in the context of change. Skibo is a Research Anthropologist in the Laboratory of Traditional Technology in the Department of Anthropology at the University of Arizona.

Miriam T. Stark is a doctoral candidate at the University of Arizona. Her dissertation research focuses on the dynamics of Kalinga ceramic specialization and is based on data collected through the Kalinga Ethnoarchaeological Project. Her Kalinga research represents part of a broader interest in ceramic production and distribution that explores relationships between economy, society, and technology. Other research on these issues is currently underway with ceramics from the prehistoric American Southwest. Stark is currently a graduate Research Associate at the University of Arizona.

Glenn Davis Stone has done archaeological field work in the midwestern and southwestern U.S., and ethnoarchaeological field work among the Kofyar of Nigeria. His main interests include ancient and modern agricultural systems and settlement patterns, and the use of computers in archaeological analysis. He received his Ph.D. from the University of Arizona in 1988, and is currently Assistant Professor in the Anthropology Department at Columbia University in New York.

Nan A. Rothschild is Associate Professor of Anthropology at Barnard College, Columbia University. She received her Ph.D. from New York University. Her field research began in the Zuni area, but has mostly been conducted in and around New York City. She has recently published *New York City Neighborhoods, the Eighteenth Century* (Academic Press). She has also published on prehistoric archaeology, historical archaeology, museology, and ethnoarchaeology.

Suzanne Page

Lewis R. Binford's archaeological interests cover the world. His ethnoarchaeological field work has taken place among the Nunamiut, the Alyawara in Australia, the Navajo in Arizona, and the !Kung San in South Africa. This archaeological and ethnographic research is reported in numerous books and articles, including the well-known *In Pursuit of the Past* (Thames and Hudson, 1983). Binford received his Ph.D. from the University of Michigan. He is presently Visiting Professor of Anthropology at Southern Methodist University. (Here he and two young friends "howl like wolves.")

Lee Horne has carried out archaeological field work in Iran, New Mexico, and Syria, and ethnographic field work in Iran and India. She holds a Ph.D. from the University of Pennsylvania, where she is a Research Associate at The University Museum and Editor of *Expedition Magazine*. She is currently completing a field project on the technology of lost wax brasscasting in West Bengal.

Warren R. DeBoer decided to be a New World archaeologist while stationed as an "army brat" in Japan and Germany. After undergraduate training at Beloit College and the University of Illinois, he pursued graduate work at the University of California-Berkeley, receiving his Ph.D. in 1972. His research and publications deal with the prehistory and ethnoarchaeology of lowland South America. He is currently Professor of Anthropology at Queens College of the City University of New York.

John H. Blitz got his first field training in archaeology as an undergraduate at the University of Alabama. His principal research interests are the late prehistoric and early historic societies of the southeastern United States. He has also participated in archaeological field work in Mexico and Ecuador, and received his doctorate from the City University of New York in 1991.
