

Phil Chase received his Ph.D. from the University of Arizona in 1986 and is now a computer specialist at The University Museum. He is a specialist in the archaeology of Lower and Middle Paleolithic Europe, and concentrates on the analysis of animal remains and on the evolution of the human mind. He is zooarchaeologist for current excavations at the Middle Paleolithic site of La Quina, Charente, France, and Co-Director of excavations at the Lower Paleolithic site of Cagny-l'Épinette, Somme, France.

Nancy Minugh-Purvis is an Assistant Professor of Anatomy and Neurobiology at The Medical College of Pennsylvania and a Research Associate in the Physical Anthropology Section of The University Museum. She received her Ph.D. in Anthropology from the University of Pennsylvania in 1988. She has traveled extensively in Europe and elsewhere since 1978, studying the skeletal remains of Neanderthal and early modern children. Her primary research interests are in craniofacial biology, and in patterns of growth and development in prehistoric *Homo sapiens*, particularly Neanderthals. Her research has been presented at numerous scientific meetings and symposia, and she is currently writing a monograph on the growth of the Neanderthal skull.

Harold Dibble is an Associate Professor of Anthropology at the University of Pennsylvania and Associate Curator at The University Museum. He was Associate Director of the excavation of the Middle Paleolithic site of La Quina (Charente, France), and Co-Director for the Middle Paleolithic excavations at Combe-Capelle (Dordogne, France). Currently he is co-directing excavations at the Lower Paleolithic French site of Cagny; he is shown here (front row, left) with the 1992 Cagny-l'Épinette excavation team. He is the author of several articles on the Middle Paleolithic and on computer applications to archaeology, and has edited two volumes on the Paleolithic published by The University Museum.

Randall White is an Associate Professor of Anthropology at New York University and Executive Director of the Institute for Ice Age Studies. His research over the past 15 years has focused on the European Upper Paleolithic. He is the author of two books, *Upper Paleolithic Land-Use in the Périgord* and *Dark Caves, Bright Visions: Life in Ice Age Europe*, as well as numerous scholarly papers. Currently he is working on a book on the first 10,000 years of human personal adornment.
